Summary

Highly skilled Software Engineer with a proven track record in designing, developing, and optimizing high-performance, scalable web applications. Proficient in modern frontend frameworks like React and Next.js, with deep expertise in TypeScript, system design principles, and building reusable components. Experienced in integrating AI-assisted tools like Cursor and ChatGPT into the development workflow to enhance productivity, improve code quality, and accelerate problem-solving through intelligent prompt engineering. Demonstrated ability to drive performance optimization, ensure application health, and implement robust CI/CD pipelines for continuous delivery in fast-paced environments. Passionate about crafting exceptional user experiences and contributing to impactful, high-growth projects.

Skills

- Technical Skills:** JavaScript, TypeScript, React.js, React Native, Next.js, Redux, React Query, HTML5, CSS3, Tailwind CSS, Styled-Components, Node.js, Git, CI/CD, Webpack, Performance Optimization, AI-Assisted Development, Jira, Figma.
- Professional Skills:** Problem-solving, Technical Leadership, Strategic Planning, System Design, Team Collaboration.

Work Experience

Frontend Developer September 2024 - Present
Softera Remote

- Engineered scalable web applications, leading the development of core modules for secure authentication and complex scheduling workflows.
- Owned the production lifecycle through deployment, proactive monitoring, and troubleshooting to ensure high application uptime and performance.
- Instituted secure coding and data handling standards, directly improving system resilience and data integrity.

Frontend Developer September 2022 - August 2024
Vidills Remote

- Developed and optimized frontend features for customer-facing applications, significantly enhancing user experience and driving measurable performance improvements.
- Contributed to enterprise-level web platforms by building scalable modules and implementing efficient, real-time data synchronization solutions.
- Engineered modular and reusable React components, managed application state with Redux Toolkit, and integrated seamlessly with both REST and GraphQL APIs.

Fullstack Developer January 2022 - November 2022
Procoor Solutions Cairo, Egypt

- Developed and maintained high-traffic web applications, serving over 600K users and increasing engagement by 95%.
- Resolved 97% of critical frontend issues, significantly reducing downtime and enhancing overall customer experience.
- Drove project delivery improvements by implementing Agile workflows, which reduced cycle time by 50% and increased on-time completion rates by 80%.

Fullstack Developer October 2020 - December 2021
Military Records Cairo, Egypt

- Enhanced system efficiency by 45% through frontend optimization and streamlining record processing workflows.
- Built and successfully launched a high-volume web service, "Identity Document Application," serving over 3 million users.
- Reduced application processing time by 30% for 3M+ users, significantly improving user satisfaction.

Education

Ain Shams University Cairo, Egypt
B.Sc. in Information and Computer Science *software Engineering* *2016 - 2020* *GPA:3.27*

Projects

[Sakenah Academy](#)

A training & educational platform in mental health/psychology. The platform provides comprehensive educational resources and training programs for professionals and individuals interested in mental health and psychology.

[Awafi Clinic](#)

Awafi Clinic is a Saudi platform for remote psychological care, specializing in mental health, psychotherapy (Cognitive Behavioral Therapy), and family medicine. It operates using the Stepped Care model and therapeutic programs, under the supervision of Dr. Khalid Bin Hamad Al-Jaber, who has over 25 years of experience in Cognitive Behavioral Therapy.

[Al Fagala](#)

An online store based in Egypt that specializes in sanitary ware and bathroom fixtures. The website sells a wide range of products and offers features like cash-on-delivery payment, same-day delivery, and custom price quotes.

[Portfolio Website](#)

Developed a personal portfolio website showcasing projects, optimized for performance, SEO, and responsive design using modern frontend technologies.

Certifications

EF SET Certificate (English C1 Advanced), EF SET

2024-07
